

Don't Let Time Pass You By...

With ASE's Migration Services for FileNet, FileNet customers can easily move forward in time to the newer Content Manager environment. Made up of software and methodologies, AMS ports data off FileNet's Report Manager to the newer Content Manager architecture.

ASE's solution for migrating FileNet Report Manager users to Content Manager or Image Services, is a suite of software and methodologies designed to meet the needs of today's ever changing content base. With a planned role out that includes the preservation of historical and present content, ASE's Migration Services will swiftly migrate your organizations content to the newer and more powerful P8 platform.

With an emphasis on leveraging an organizations current content structure the ASE solution eliminates the need to re-create content indexes and metadata by using a unique combination of saving and writing actions for content migration. Using this methodology your previous investments are leveraged and protected!

<i>Feature</i>	<i>Benefit</i>
Operational Efficiency	Streamline operational procedures for better services
Resource Efficiency	ASE managed migration reduces risk and internal teams work loads
"Statementize"	Improve customer intimacy by "statementizing" customer reports
Open Format	Eliminate FileNet's proprietary format. Use Adobe Reader on text and APA reports and Statements
Data Scraping	Provide Full Text Indexing on all statements and reports
Re-evaluate	Enhance business value of content

Planned Role-Out...

ASE's Migration Services four stage role-out is a proven methodology for a successful and resourceful migration of an organizations Report Manager content to a more robust expandable platform.

Assessment	Assessment	<ul style="list-style-type: none"> - Data Gathering - Scope of Work Created - Acceptance Criteria Defined
Migration	Analysis/Planning Initial Migration User Acceptance	<ul style="list-style-type: none"> - Project Plan and Data Model Created - Historical Data Migration Completed - User Acceptance Completed
Audit	Catch-up Migration Conversion Audit	<ul style="list-style-type: none"> - All Content Migration Completed - Sampling of content and spot checks
Live	Cut-Over Project Conclusion	<ul style="list-style-type: none"> - Users go live on new system
